The art of record also fails to show or teach the transmission device as defined in claim 23, wherein the first rotary member comprises a wheel consisting of disks and the second rotary member comprises a shaft associated coaxially with a relative bushing with which the clamping means are able to cooperate.

The art fails to show or render obvious the transmission device defined in claim 25, wherein the braking member is of the mechanical type, comprising interference

means associated with relative elastic contrasting means and able to move into contact with the first rotary member when a thruster element is driven.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Response to Amendment***
